

**Wood County
Town of Cary
Utility
Accommodation
Policy**

INTRODUCTION

A.

Overview of Utility Accommodation

The Town constructs, operates, and maintains the Town Highway System. Utility companies provide service to major centers of population as well as to individual users. Both the town and utility companies typically provide facilities that consider future as well as present needs. Cooperation between these two entities is essential if the public

is to be served at the lowest costs consistent with the respective public service needs, obligations, and interests.

B. Primary Purpose of the Town Highway System

The primary purpose of the Town Highway System is to provide a safe and convenient means for the vehicular transportation of people and goods. Any permitted use and occupancy of highway right-of-way for non-highway purposes is subordinate to the primary interests of the traveling public.

C. Purpose of the Utility Accommodation Policy

The purpose of this document is to prescribe the policies and procedures that shall be met by any utility whose facility currently occupies, or will occupy in the future, any Town Highway or bridge over which the town has maintenance jurisdiction.

D. Utility Accommodation

1. Permits

It is the policy of the town to permit utility facilities on Town Highways when:

- a. Such use and occupancy does not adversely affect the primary functions of the highways or materially impair their safety, operational, or visual qualities.
- b. There would be no conflict with the provisions of federal, state, or local laws or regulations or the accommodation provisions stated herein, and
- c. The occupancies would not significantly increase the difficulty or future cost of highway construction or maintenance.

2. Additions

Nothing in this policy shall be construed as limiting the rights of the town to impose restrictions or requirements in addition to and/or deviations from those stated herein in any permit where the town deems it advisable to do so. An appropriate explanation for such action should be provided to the utility.

3. Alterations

The permitted facilities shall, if necessary, be altered by the utility to facilitate alteration, improvement, safety control, or maintenance of the highway as may be ordered after permit approval. All costs for constructing, maintaining, altering, and

relocating the permitted facilities shall be the obligation of the applicant, unless a specific town-executed utility parcel or agreement otherwise provides. If the utility encounters a hardship during installation that prevents installation in accordance with the permit, the utility may (at the risk of having to move the installation) make changes to permitted installation. The town has final determination as to the validity of the hardship. If the town determines that the changes were made due to the installer's preference, and not due to hardship, the utility will take action within 10 days to correct such alterations. For clarification purposes: hardships are solid rock, uncrossable swamps, cemeteries, or similar circumstances that make construction physically or economically unfeasible.

Town of Cary Utility Policy

Permit Requirements

A. Need for a Permit

A utility shall obtain a permit from the town before any use or occupancy of town highways is allowed.

B. Permit Authorization to Use and/or Occupy Right-of-Way

By issuance of a permit, the town formally indicated that subject to all applicable permit conditions, a specified use and/or occupancy of right-of-way is not averse to the highway interests at the time of the permit approval.

The town does not warrant that public title to the right-of-way is free and clear, does not certify that it has sole ownership, and does not indicate any intention to defend the utility in its peaceful use and occupancy of said lands.

The permit does not transfer any land; nor give, grant, or convey any land right, right in land, or easement.

Written authorization from the town does not relieve the utility from compliance with all applicable federal and state laws codes, and local laws and ordinances which affect the design, construction, materials, or performance of the work. The town's authorization shall not be construed as superseding any other governmental agency's more restrictive requirements.

Each permit shall require that the standard indemnification language is part of the overall document.

No subcontracting of work.

The utility should retain a copy of the permit in their files during the entire time the facility is located on, over, or under Town Highway right-of-way.

A copy of the approved and signed permit shall be available on construction site.

If you have any comments or questions concerning the above, please contact our Town Chairman—Mark Gosh at 715-884-3279

REQUIRED INFORMATION

A. General Policy

A utility's request to use and occupy the right-of-way cannot be considered until adequate information is provided. The amount of detail will vary with the complexity of the installation and highway involved, but must include the appropriate permit form, drawings or sketches, and installation information so that the effect on the highway operation, traffic safety, and visual qualities can be evaluated.

B. Permit Application Forms

Alteration of the permit form by the applicant is prohibited and shall be cause for the application rejection or permit revocation.

One original, with attached copies, of the permit form shall be submitted per application to the Town Clerk via regular mail, courier service, or delivered in person.

The telephone number, name and address, and email address of the applicant shall be included on each permit form.

The current permit form is shown in the appendix

C. Permit Drawings

1. Each permit application shall use the map provided showing the existing and/or proposed location of all utility facilities within the right-of-way with respect to the existing highway or any planned highway improvement. The details shall include dimensions from the proposed utility installation to the commonly accepted right-of-way line and to the edge of the travelled way. For highway crossings, a cross-section detail showing depth of bury or overhead clearance is required along with the location of any bore pits (if needed). A distance reference from the crossing to the nearest public roadway intersection is also required. Land tes (e.g. approximate distance from the proposed facility to side road intersection, county line, etc.) shall be submitted with all permit drawings.
2. No tree shall be cut, trimmed or branches broken in the construction, without owner's consent. State Statute 86.16 (3).

D. Installation Information

The utility shall provide installation information:

1. This information shall include, but is not limited to, a general description of the location, size, type, nature, and extent of the utility facilities to be installed or to be adjusted, and the impact within the right-of-way.

2. The town may require the utility to provide a description of the proposed construction procedures, special traffic control and protection measures, proposed access points, coordination of activities with highway contractor, and/or vegetation to be removed.
3. When an attachment to a structure is proposed, additional information is required. This information should include, but not be limited to, bridge number, weight of lines, hanger spacing, hanger details, and expansion/contraction details.

E. Metric/English Units

Although the town may be working with the Metric system in the future, English units or English units followed by metric equivalents in parenthesis should be used on all permit forms. After the town's formal conversion to the Metric system this section may be changed to reflect new metric permit requirements.

F. Fees

Right-of-Way Permit Fee: \$25.00

LOCATION REQUIREMENTS

A. General Location

Utility facilities shall be located in such a manner in order to minimize the need for later adjustment to:

1. Accommodate proposed highway improvements.
2. Permit servicing or expanding such lines without obstruction or interference to the free flow of highway traffic.
3. Provide adequate vertical and horizontal clearance between an underground utility facility and a structure or other highway facility to allow maintenance of all facilities.
4. Be outside the 45-degree cone of support for the footings of all highway structures.

B. Crossing Location

Utility facilities shall cross the highway on a line as nearly perpendicular to the highway alignment as possible.

Conditions which are generally unsuitable or undesirable for underground crossings should be avoided. Crossing locations to be avoided include:

1. Deep cuts
2. Near footings of bridges and retaining walls

3. Across highway intersections at grade or ramp terminals
4. At cross drains where the flow of water may be obstructed
5. Within basins of an underpass drained by a pump
6. In a wet or rock terrain where it will be difficult to attain minimum bury.

C. Underground Longitudinal Location

The longitudinal location of underground utility facilities within the right-of-way shall provide as much clearance from the traveled way as conditions will allow. Such lines shall be on uniform alignment and be located at or as near as practical to the right-of-way line.

To maintain a reasonable uniform utility alignment, location variances may be allowed when irregular-shaped portions of the right-of-way extend beyond normal right-of-way limits. No utility lines are allowed in the ditch bottom or on the in-slope.

D. Above Ground Longitudinal Location

The longitudinal location of above ground utility facilities shall be outside of the clear zone. Such lines shall be on a uniform alignment and be located at or as near as practical to the right-of-way line.

If any above ground utility facility is within the clear zone or is determined to be in a location that has a higher-than-average potential, the town may require:

1. The utility facility to be approved yielding or breakaway construction, or
2. The utility facility to be protected by a town approved barrier such as beam guard, crash cushion, etc. To maintain a reasonably uniform utility alignment, location variances may be allowed when irregular-shaped portions of the right-of-way extend beyond normal right-of-way limits.

E. Existing Utilities

When a utility facility exists within the right-of-way of an existing or proposed highway, it may remain provided it does not adversely affect highway safety based on sound engineering judgement and economic considerations. The existing facility shall be relocated if:

1. It conflicts with any construction or maintenance activities,
2. It is located longitudinally under the pavement or shoulder for a reconditioning or reconstructed project,

3. Is found to not be within accepted standards for depth of bury, or overhead clearance or in locations not acceptable to the town.

Exceptions may be granted for 1 and 2 above based on sound engineering judgement and economic considerations.

*The Town will be notified before any action is taken on any existing utility facility.

TOWN OF CARY

Ordinance Number 2024-001

Permit to Construct, Maintain or Repair
Utilities within Town Road Right-of-Way

Permit No: _____
Road/route—See attached map

NAME: _____

Location: See Map of Town of Cary

ADDRESS: _____

Office Phone: _____

Local Phone: _____

Type of Utility Installation: _____

Plans Prepared By: _____

Utility Location Is: To Cross Roadway
 Overhead

Parallel to C/L of Road
 Underground

*Check all that apply

Proposed Method of Installation:

Tunnel Trench Open Cut Suspend on Towers
 Jack & Bore Cased Suspend on Poles

Estimated Starting Date: _____ Estimated Restoration Date: _____

The Applicant understands and agrees that the permitted work shall comply with all Permit provisions and conditions of the Town of Cary Utility Policy/Ordinance in effect at the time of this application, and with any special provisions listed below or attached hereto, and any and all plans, details or notes attached hereto and made a part thereof.

By: _____
[Signature of Authorized Representative]

Title: _____
Dated: _____

PERMIT APPROVAL BY PERMITTING AUTHORITY

The forgoing application is hereby approved and Permit issued by Permitting Authority subject to full compliance by the Applicant with all provisions and conditions stated in the Town of Cary Utility Policy/Ordinance in effect on the date of this application.

Other Special Provisions:

By: _____
[Signature Of Authorized Permitting Representative]

Title: _____
Dated: _____

Permit Fee Paid: \$25.00

Received Of: _____

Date: _____
