

PROJECT DESCRIPTION

- A rebuild of approximately 175 miles of existing power lines to support the construction of a new, approximately 200-mile, 345-kV power line.
- The new power line will run from the Tremval Substation in Trempealeau County to an expanded Arpin Substation in Wood County and then connect to the Columbia Substation in Columbia County.

ANTICIPATED PROJECT SCHEDULE*

Written order from the PSCW

December 2025

Pre-construction ground activities**

2026 – 2027

General construction

2027 – 2030

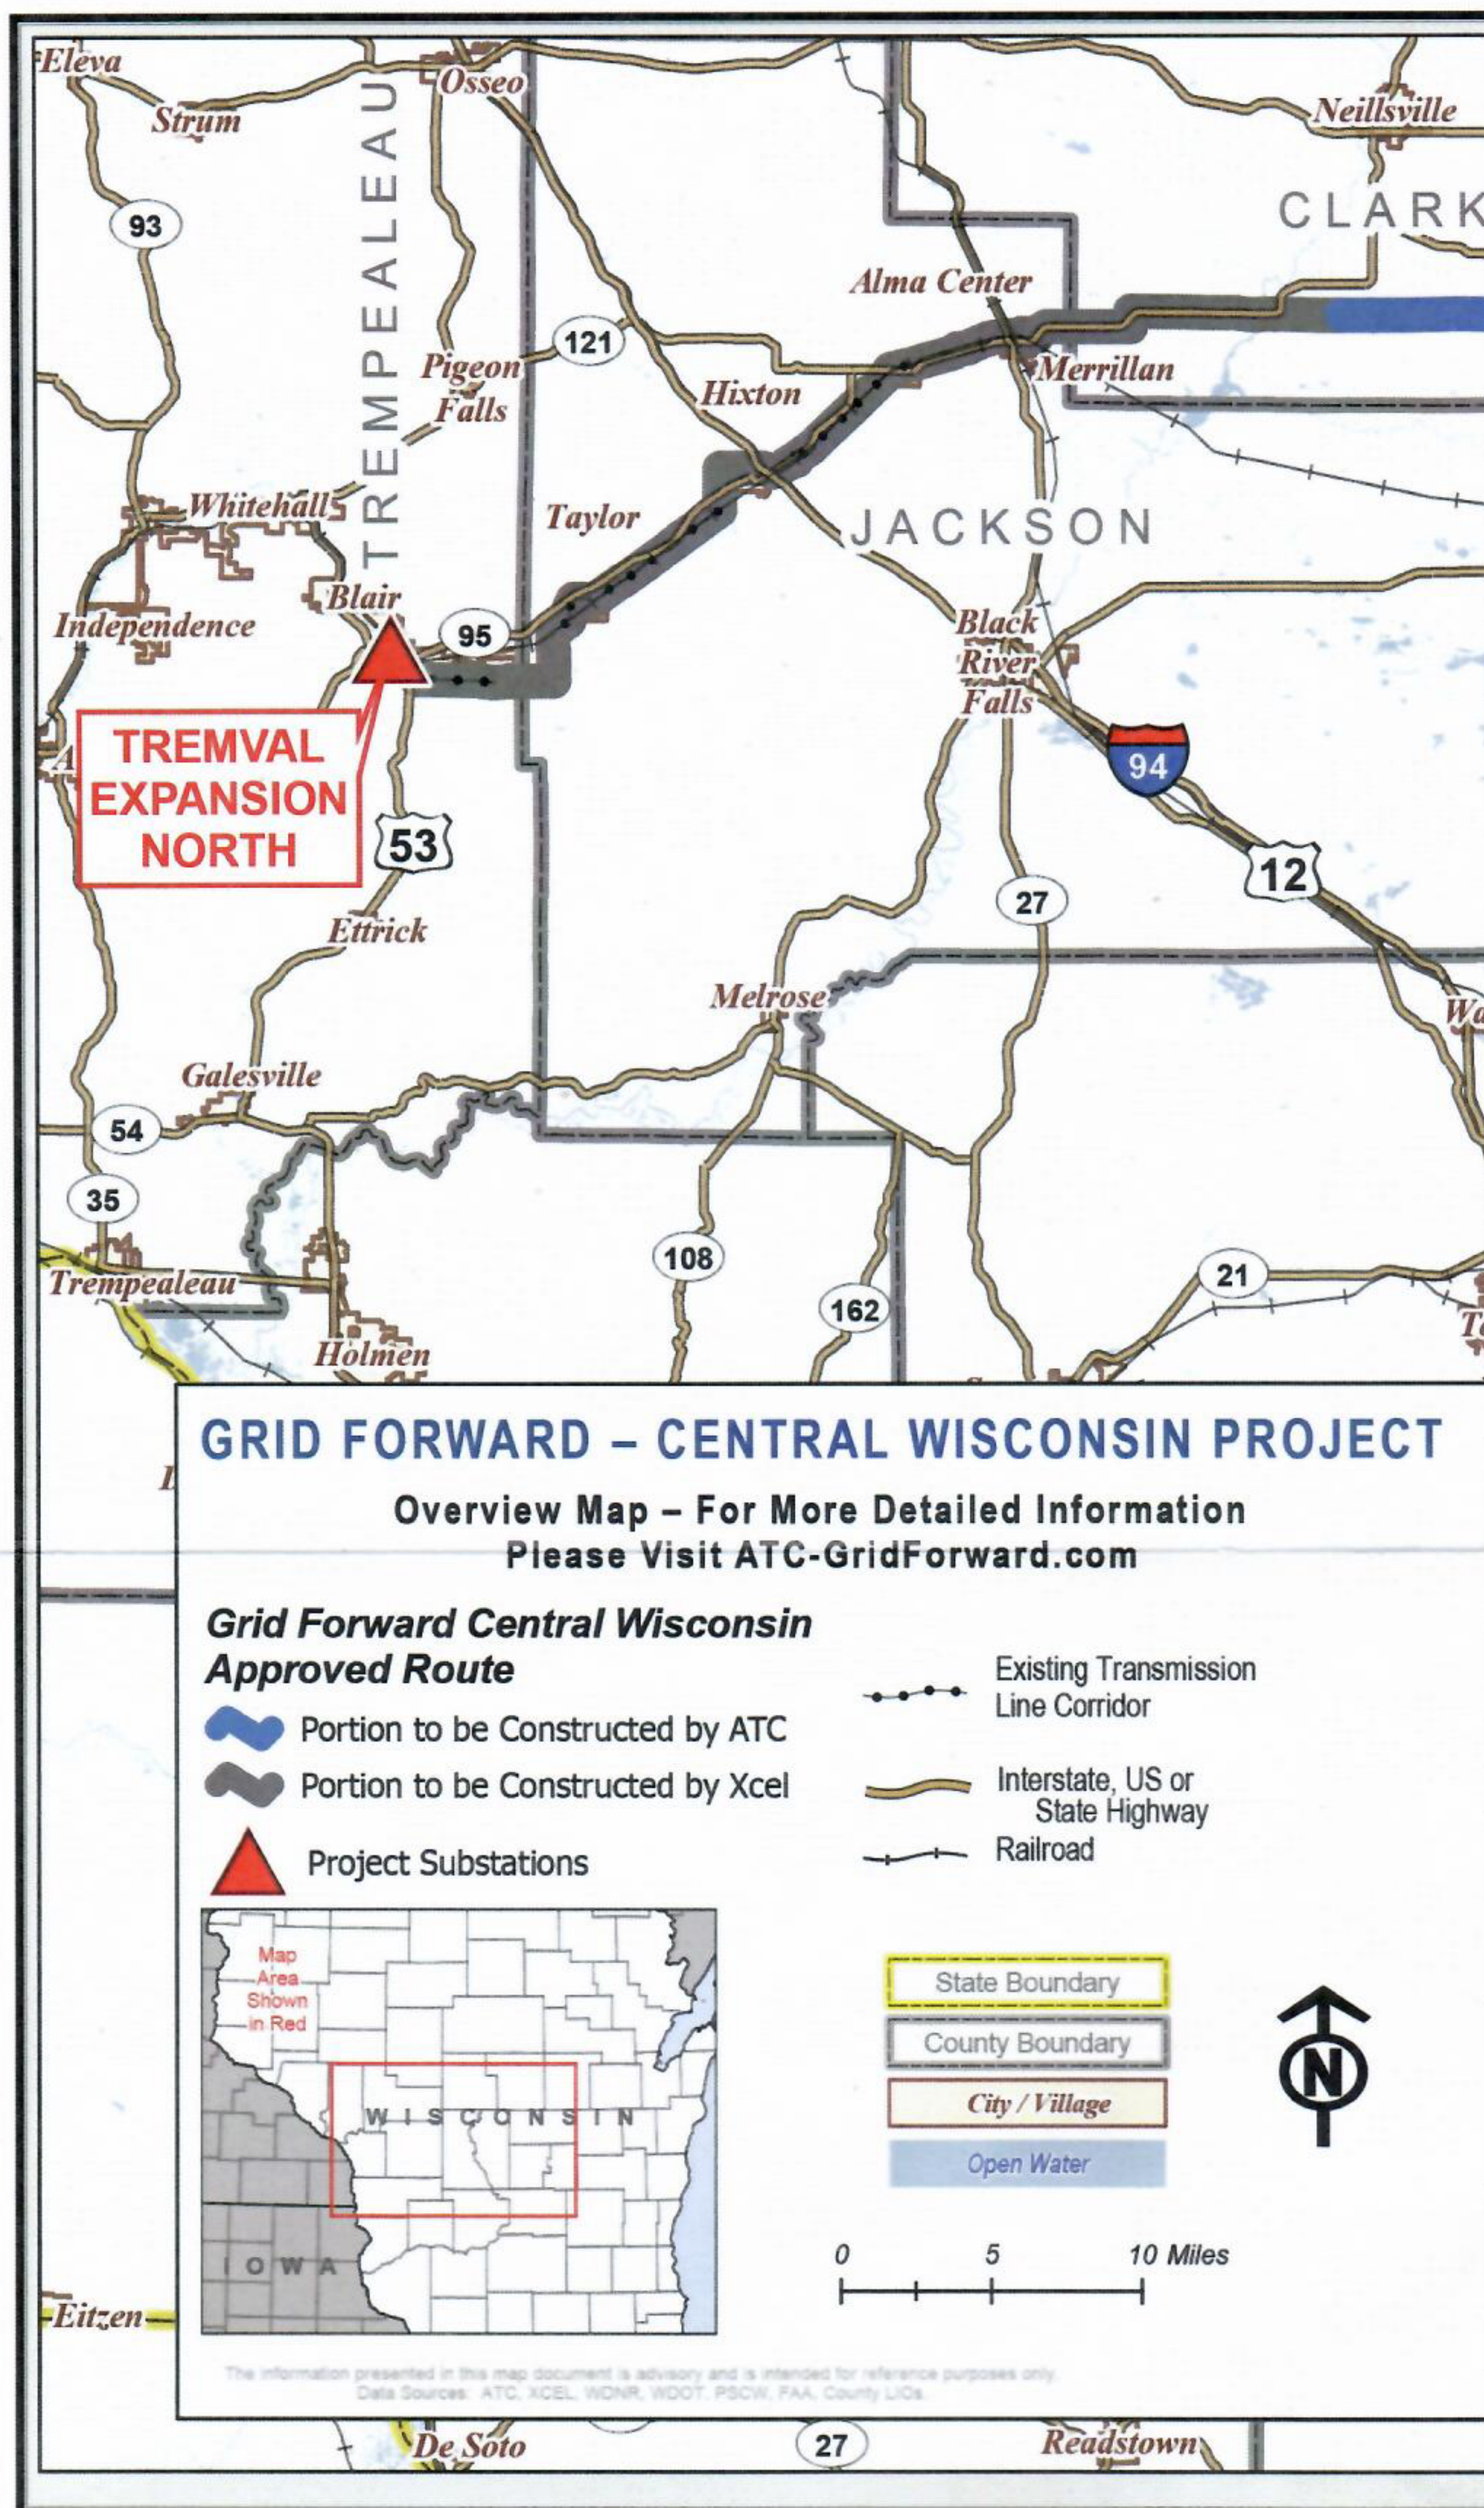

Project in service***

2030

**Subject to change*

*** Some pre-construction activities may go into 2028 in the northern portion of the project.*

**** Target for in-service of the 345-kV line from Columbia to Arpin to Tremval substations. Rebuilt lines will be energized and in-service as completed.*
